Northeast Ohio Weather Patterns & Water Damage Risk

Essential Guide for Cleveland, Brunswick & Strongsville Homeowners

Lake Effect Weather Impact:

â¢ Heavy snow accumulation leads to rapid spring melt
â¢ Ice dam formation on roofs and gutters
â¢ Foundation pressure from snowmelt
â¢ Frozen pipe risks during extreme cold

Seasonal Risk Calendar:

Winter (Dec-Feb): Frozen pipes, ice dams, foundation stress
Spring (Mar-May): Basement flooding, rapid thaw, heavy rains
Summer (Jun-Aug): Severe storms, humidity, drainage overwhelm
Fall (Sep-Nov): Gutter clogs, early freeze-thaw cycles

Prevention Strategies:

â¢ Install sump pump with battery backup
â¢ Improve exterior grading and drainage
â¢ Insulate pipes in crawlspaces and basements
â¢ Clean gutters before winter and after storms
â¢ Seal foundation cracks and air leaks

Emergency Response - Call Immediately:

(440) 832-1566
