Winter Pipe Protection â NE Ohio

Keep indoor temps and water moving when the freeze hits.

Checklist:

â¢ Keep heat â¥ 55´ºF in all rooms (even unused spaces).
â¢ Open cabinet doors under sinks to let warm air reach pipes.
â¢ Let the farthest faucet drip (hot & cold if separate).
â¢ Insulate exposed pipes in garages, crawlspaces, and exterior walls.
â¢ Install hose-bib covers; shut off & drain exterior spigots.
â¢ Know your main water shutoff; label it and keep it clear.
â¢ Set vacation/away mode with safe minimum heat if traveling.
â¢ Place water leak alarms near heaters, sumps, and appliances.
â¢ Check crawlspace/basement for drafts; close vents if advised.
â¢ Keep garage doors closed to protect plumbing runs.

If a pipe freezes or bursts:

â¢ Shut off water at the main if safe.
â¢ Cut power to affected circuits if water is near electricity.
â¢ Document with photos/video and note times.
â¢ Call AquaMaster 24/7: (440) 832-1566.
